RECALL ORDER

September 4, 2024

WH Agriculture, LLC, BC Agriculture, LLC,
SR Agriculture, LLC, dba Maggie's Farms
License #: CCD-2022-0761

Re: RECALL ORDER

Dear Mr. Winston Conkling,

On November 20, 2023, the Cannabis Control Division received a report on **Parent ID # 8839486308602637** from Precision Botanicals Laboratories Inc., identifying that this product tested positive for the prohibited pesticide pyrethrins. On August 30, 2024, the Cannabis Control Division ("CCD") requested documentation demonstrating that the cannabis flower products produced at your licensed cultivation facility (License # CCD-2022-0761) originating from **Parent ID #8839486308602637**, met the permissible action levels for the prohibited pesticide, pyrethrins. Maggie's Farms has been unable to provide such documentation. As you are unable to provide a Certificate of Analysis (COA) demonstrating that the product originating from **Parent ID 8839486308602637** passed all required pesticide testing pursuant to Section 16.8.7.15 NMAC, and to protect public health and safety, the CCD must issue an immediate recall order for all cannabis products associated with this Parent ID pursuant to Section 16.8.2.11 (E) NMAC.

All products which may have made it to market containing any quantity of Parent ID #8839486308602637 must be removed from the market and destroyed since the evidence of harmful pesticides has been detected. Any licensee and/or person who may have purchased these products from your company must be alerted by your company about the potential exposure to these pesticides from these products.

In accordance with Section 16.8.2.11 NMAC, it is a requirement of every licensee to have an approved "recall" standard operating procedure for an event such as this. Within forty-eight (48) hours of receipt of this notification, you are directed to send Chris Romero, CCD

Environmental Scientist, an email at Christopher.romero@rld.nm.gov with the information listed below. In addition, it is the responsibility of each licensee you contact regarding this recall to send a copy of the listed requested information to Christopher.romero@rld.nm.gov and to conduct their own internal recall following their standard operating procedures. Please ensure that every licensee you contact about this recall is made aware of this requirement and submits their documents in a timely manner.

- A copy of licensee's recall standard operating procedure,
- A copy of licensee's plan for notifying the affected parties and how you intend to quarantine and destroy the impacted product,
- Evidence of your communications to the impacted licensees recalling the impacted products,
- A list of all remaining inventory on hand and what remains on the market including all associated lot numbers,

In the event you have questions or concerns regarding the recall process please reach out to Chris Romero at (505) 490-0273. Thank you for your cooperation.

Respectfully,

Todd Stevens | Director
